Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer focused on automation and practical solutions. I specialize in identifying repetitive processes and turning them into efficient workflows with maintainable code and clear documentation. Currently expanding into cybersecurity and ethical hacking — understanding how things break makes me better at building them. Actively seeking opportunities in IT Support, Junior Development, or Automation.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, C, C#, SQL
- **Web:** Flask, HTML, CSS — full stack personal projects
- **Data Science & ML:** pandas, NumPy, Matplotlib, Seaborn, scikit-learn
- **Tools:** Git/GitHub, Docker, VirtualBox, Jupyter Notebook, n8n, Google Cloud
- **Cybersecurity:** Ethical hacking, pentesting, vulnerability detection, digital defense
- **Languages:** Spanish (Native), English (Intermediate)

PROJECTS

IT Monitor PRO — *2026 — In progress*

Real-time web dashboard | Python, Flask, psutil, SQLite, Chart.js

- Monitors CPU, RAM, disk, network, latency and uptime from any browser.
- Client-server architecture supporting multiple machines on a local network.
- Performance history charts and automatic offline host detection.
- github.com/AgustinRodr/monitoring_system

Starbucks Customer Analysis — *2025*

Data Science & Machine Learning | Python, pandas, scikit-learn, Seaborn

- Random Forest model achieving R^2=0.97 and RMSE=1.02 to predict total customer spend.
- Identified Mobile App channel and cart size as the main spending drivers.

Video Game Sales Analysis — *2025*

Machine Learning | Python, pandas, NumPy, Matplotlib, scikit-learn

- Analyzed 16,540 sales records up to 2020 with EDA and regional visualizations.
- Compared Linear, Ridge, and Random Forest regression models for global sales prediction.

Galaga Python — *2023*

Retro game | Python, Pygame, OOP

- Full implementation with sprite management, collision detection and level logic using OOP.

EDUCATION

National Technological University (UTN) — *2022 — Interrupted, with intention to resume*

Higher Technician in Programming — 2nd year partially completed

- Languages: JavaScript, C, Python. Operating systems and virtualization.
- OOP: modular design, patterns, and personal project development.

National University of Lujan (UNLU) — *2024 — Completed*

Argentina Programa 4.0 — Data Science & Machine Learning

- Python applied to data analysis, cleaning, transformation, and visualization.
- Supervised and unsupervised Machine Learning with scikit-learn.

CERTIFICATIONS

- Cybersecurity & Ethical Hacking — Vulnerability Detection & Digital Defense Techniques (2026)
- Machine Learning Fundamentals — UNLU, Argentina Programa 4.0 (2024)
- Introduction to Data Science — UNLU, Argentina Programa 4.0 (2024)
