PROFESSIONAL SUMMARY

Programming Technician student with strong knowledge in operating systems, virtualization, and system analysis. Skilled in Python, C, JavaScript, and SQL, with practical experience using Git and managing virtualized environments. Focused on troubleshooting, automation, and backend development, seeking to contribute in IT Support or Junior Development roles.

EDUCATION

UNIVERSIDAD TECNOLÓGICA NACIONAL (UTN) | *Argentina Higher Technician in Programming (Técnico Superior en Programación)* | **2nd Year Partially Completed**

- Focus on Data Science and Analytics: Python(Pandas, Numpy), SQL, statistics, and data visualization (Matplotlib, Seaborn)
- Core modules: Operating Systems, System Virtualization, OOP (Object-Oriented Programming)

UNIVERSIDAD NACIONAL DE LUJÁN (UNLU) | *Argentina Programa 4.0* | **Completed**

- Python programing applied to data analysis
- Data cleaning, transformation, and visualization techniques
- Introduction to Data Science concepts and statistical methods
- Fundamentals of Machine Learning : supervised and unsupervised models

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, C, C#, JavaScript
- **Data Science:** pandas, NumPy, Matplotlib, Seaborn, scikit-learn
- **Tools & Technologies:** Git/GitHub, Jupyter Notebook, Google Colab, VirtualBox
- **Languages:** Spanish (Native), English (Intermediate)

CERTIFICATIONS

- **Python Programming** – UNLU (Argentina Programa 4.0)
- **Data Analysis & Transformation** – UNLU (Argentina Programa 4.0)
- **Introduction to Data Science** – UNLU (Argentina Programa 4.0)
- **Machine Learning Fundamentals** – UNLU (Argentina Programa 4.0)

PROJECTS & EXPERIENCE

Independent Developer / Student Projects | *Ongoing*

- Python & SQL for data analysis and transformation
- Virtualized environments with **VirtualBox** and **Linux**
- Version control workflows using **Git and GitHub**
